

AMERICAN PHARMACEUTICALS SERVICES

Corporate Headquarters
Chicago, Illinois

Economy

Expanding to a full office floor to meet APS's staff growth requirements created unique design opportunities. TKA's detailed planning included recycling resources such as doors, ceiling systems, and light fixtures from the vacating tenants into the newly configured space. This approach enabled APS to meet a more aggressive construction schedule at a lower cost.

Flexibility

Master planning and standardization of employee workstations were sensitive to projected growth while providing a distinctive and efficient work environment.

*Challenging program
required flexibility in
design and economy
of existing resources*
