Corridors One
Downers Grove, Illinois

Phased Relocation Within Time Frame and Under Budget

As the anchor tenant of a new class A office building, the Lucent Design by TKA set the standards for all tenants to follow. TKA's challenge was to move 18 work groups to this new location with minimum disruption to work progress, while utilizing existing furniture. Eight separate moves in two week intervals proved a successful means of accomplishing a smooth transition to this new premier facility.

Nature as the Theme

Moving from a windowless single story industrial-like facility to a five story atrium building surrounded by wide expanses of trees and views, set the theme for the interior.

Carpeting in an organic stylized leaf pattern in neutral, subtle tones provides an anchor for the multicolored furniture system panels and changing exterior landscape. Wall coverings in a pattern reminiscent of indigenous plantings, with blue-green accents further reflect the natural outdoor elements.
