Dear Mr. Kapusta:

On behalf of the National Association of Energy Service Companies, I would like to thank you for participating in the NAESCO Midwest Regional Meeting on June 11, 2008. The event provided an excellent forum for attendees and presenters to discuss the opportunities and challenges facing those working to establish green best practices and to maximize the use of cost effective technologies and strategies in meeting the goal of creating green buildings. We are pleased you were able to join us. Your presentation was most informative building as it did on your experiences navigating this new market.

We believe that ESCOs through their aggressive pursuit of maximizing energy savings have long been in the vanguard of the pursuit of green buildings. What is exciting is that other professionals and market providers are expanding the opportunities for energy efficiency by establishing an even broader canvas for energy efficiency. Joining with our fellow professionals, we believe that NAESCO members have much to learn from other green providers. This meeting was, we hope, a public declaration that ESCOs working with other professionals can refine and reshape green building opportunities to maximize all energy and water savings, enhance the level of comfort for building occupants, and maximize the positive social and environmental impact.

We look forward to seeing you at future NAESCO events.

Sincerely,

Terry E. Singer
Executive Director
